WORK EXPERIENCE

REACT FULL STACK WEB DEVELOPER (REMOTE)

Freelance, Baguio City, Philippines

APR - 2020

JUL - 2021

Implemented a mobile-first responsive design of a website using React, React-Bootstrap, and Parcel Bundler, while using Netlify for deployment.

WEB / MOBILE DEV INTERN (REMOTE)

Poblacion.ph, Makati City, Philippines

SEP - 2021

MAY - 2022

Worked as an intern for a startup e-commerce company which utilized CS-Cart for its development, doing all around roles such as being a web developer for the CTA of our online marketplace and as the main mobile developer for its Android and IOS release.

Handled the site's administration panel and MySQL database while also performing DevOps that streamlined the process of syncing our local changes to our remote repo and production.

Gained a lot of soft skills experience during progress reports in our weekly tech stand-ups specially in communicating with our foreign investor.

ANDROID MOBILE DEVELOPER (PART-TIME)

Para Po!, Baguio City, Philippines

DEC - 2023

PRESENT

Utilized Mapbox APIs and SDKs to create a mobile navigation app for one of the tech startups of our university's incubator program which provides information about the jeepney (a public utility vehicle in the Philippines) terminals, fares, and routes in Baguio.
